1. Attendance, shifting or steady, officers and members, other factors affecting.
2. Teaching techniques used, class participation, reading or assignments. Preparation by students?
3. Resulting student activity as far as can be judged.
4. Subjects discussed.
5. Other pertinent information, "human interest" points, etc.

CLASS
(Night &
subject)

Thurs. Lab. Law + Pub Speaking. Class met for first time -- Attendance ⁵ not so good -- less than half of number who signed up. -- Excuse (reasonable) given by those ^{present at the} absentees was the sudden change in weather + temperature -- high winds probably result of storm area in near-by territory.

Interest quite high among those who came. Conscious of their need of assistance in getting their union started.

Free discussion from all but one member of class.

Friday's Class Labor History. First meeting -- attendance 8. Class requested a synopsis of the course in Economics, Labor History + Consumers Cooperatives. This was done so they might decide on their final choice. Decision was for Labor History.

Temporary meeting place the City Library... but bec. of a ruling of library board no single group can be given space in the library for a series of meetings... Class instructed me to try city Y.M., City Hall + any other centrally located places where meetings can be held free of charge... and as a last resort -- if we have to pay for space -- see Unitarian Church.

The no smoking rule in the library seemed to have annoyed three or four members of the class quite a bit -- so much so that they went into the boiler room to take their puffs.

Group quite conscientious + seemed eager to bring to class all who ^{signed up first.}

Laundry Workers

Hotel, Rest, Tavern Workers
